

STORMWATER SURVEY

THE CITY OF LA CYGNE IS WORKING WITH BG CONSULTANTS ON PREPARING A STORMWATER MASTER PLAN WHICH WILL OUTLINE THE ACCESSWAYS FOR WATERFLOW. THE MASTER PLAN WILL ALSO IDENTIFY THE PROJECT BY PRIORITY TO BE PERFORMED IN ORDER TO ACHIEVE THE ACCESS NEEDED TO MOVE THE WATER TOWARDS THE NATURAL CREEKS AND RIVER.

PLEASE COMPLETE THE COMMUNITY SURVEY WHICH CAN BE FOUND ON THE LA CYGNE CITY HALL FACEBOOK PAGE AND WWW.CITYOFLACYGNE.ORG. HARD COPIES ARE AVAILABLE AT THE LA CYGNE CITY HALL AND LA CYGNE LIBRARY.

PLANNING AND ZONING COMPREHENSIVE PLAN:

The City Council and Planning Commissioners have been diligently working on updating the City of La Cygne Comprehensive plan. The comprehensive plan is a “RESUME” for the City of La Cygne. It maps out and defines the vision of the governing body, planning commissioners and patrons for the next three to twenty years.

Community surveys have been reviewed and the governing bodies, with assistance from IBTS, are preparing a draft for the community to review at the next *town hall meeting*. **WE NEED YOU TO ATTEND TO MAKE SURE YOUR VISION HAS BEEN HEARD!** Watch for flyers in October 2022.

PROJECT UPDATES

SEWER REHABILITATION PROJECT:

First of all, the city would like to thank you for your patience as we continue to improve the infrastructure of the City of La Cygne. The Sewer Rehabilitation Project has moved forward at a great pace. The preconstruction CCTV of the sewer main is complete, the manhole rehabilitations and point repairs on the mains have been completed, Nowak Construction is currently working on the five(5) main sections which need to be replaced.

SAK, a subcontractor of Nowak Construction, is performing the relining of the mains. This is a very interesting process which does interrupt your service for approximately 3-5 hours. SAK is placing door-hangers on the door prior to working in your area. There is an odor which smells like fiberglass/acetone that can travel in to your home if you have any dry traps. Simply placing a wet towel over floor drains or openings can help prevent the odor from traveling in to your home. If necessary, open your windows for a brief period after completion to vent your house.

KDOT CCLIP Hwy 152 and Industrial Blvd.

As a part of a grant from KDOT, the city was able to replace the intersection at KS highway 152 and Industrial Blvd. The new addition of turning lanes will greatly assist with the truck traffic turning at the intersection to access the Linn County Industrial Park. Killough Construction was able to maintain the flow of traffic throughout the project which was a blessing for the delivery trucks. The city is pleased with the work performed by Killough Construction. We are thankful to finally have a safer flow of traffic through this zone.
