HOW TO SAVE ON YOUR NATURAL GAS BILLS?

Seal it up. Check for leaks around windows, doors, and other openings to the outside. Seal these leaks with caulk to keep the warmth in.

Furnace Checkup. Have your furnace and heating system inspected annually to check for leaks or other problems.

Insulate. Wrap old water heaters with proper insulating jackets and set the temperature to 120°F (or lower). Insulate your plumbing.

Use mother nature. When it's cold outside but also sunny, open the blinds during the day to let the sun help heat your home.

Wash cold. Whenever possible, use the cold water setting on your washing machine.

Check and replace HVAC filters. New filters usually only cost a few dollars. Dirty filters cost more to use, overwork the equipment, and result in lower indoor air quality. The filters should be replaced regularly.

Control the temperature. Set the temperature to 68°F or lower in the winter. A programmable thermostat can make it easy to set back your temperature.

CITY of *La Cygne* NEWS

FALL 2022 EDITION

NOTES FROM THE MAYOR:

The city's sewer rehabilitation project is in full swing! We want to thank all the citizens of La Cygne for your patience and understanding throughout this process. You have experienced road closures, rerouting, rough roads and funky odors. We appreciate your tolerance of these inconveniences. It will be great to complete another very needed infrastructure project! Hang in there it will all be worth it in the end! Happy Fall!

Mayor Debra Wilson
